

Retrieval-Augmented Generation

RAG

- Provide additional context / data to your LLM
- Goal
  - Provide custom information
  - Provide current information
  - Reduce hallucination

RAG

- Preparation
  - Store information in vector store
- Application workflow
  - Query vector store for relevant information
  - Add information to prompt

Dependencies

- Out-of-the-box support for RAG
  - spring-ai-advisors-vector-store
- Vector stores
  - spring-ai-starter-vector-store-<VectorStoreName>

Code Samples

Custom RAG flows

- Design your own RAG flow
- Dependency
  - spring-ai-rag

Custom RAG flows

- Pre-Retrieval
  - Optional query transformation
- Retrieval
- Post-Retrieval
  - Optional document post-processing
  - Prompt augmentation
- Generation / LLM response
